- Application down to 35°F

## Super Premium Exterior That Lasts a Lifetime. Guaranteed.

At PPG PAINTS™ we are dedicated to helping you do your best work on every job. We stand behind every product and give you our best **BECAUSE EVERY JOB MATTERS®**.

### Cross Linking Technology

The cross linking 100% acrylic resin in *Timeless* uses the features found in two-component high performance coatings to form a durable bond in one amazing coat.

### High Film Build

The extremely high film build of *Timeless* provides a much thicker layer of paint for a stronger, more durable finish.

### One Coat Coverage\*

The high film build of *Timeless* allows most projects to be completed in one coat. This saves time and money, creates a stronger finish, and provides a lifetime of beauty and protection.

\*Wood rich in tannin such as cedar and redwood require two coats. The first coat must dry for 24 hours prior to application of second coat.

### Super Adhesion

Formulated with cross linking resins that adhere to even the most difficult substrates, *Timeless* protects against cracking, flaking or peeling for a lifetime.

### Bridges Cracks

For a smooth, continuous film, *Timeless* bridges cracks and protects from wear and weathering. This means less labor time filling and priming trouble spots.

### Mildew & Algae Resistance

*Timeless* provides 4-way protection against mildew and algae discoloration to keep paint clean and beautiful.
